

CASE STUDY

MORGAN SINDALL

Project – Asbestos Remediation Project at Albion Brewery

Location – Albion Yard Basements

Duration – July 2011 to January 2012

Value – Circa £62k, completed on time and within the budget

Scope of Work –

The works involve the decontamination of asbestos thermal insulation debris and residues to surfaces and the basement area and removal of asbestos containing thermal insulation to pipes.

Forest Environmental carried out the removal of asbestos thermal insulation pipe lagging and asbestos thermal insulation debris to surfaces and residues to some pipework in the basement area.

Client Feedback –

“We confirm that, as with work you’ve carried out for us in the past, your performance was excellent and we would be happy to use your services in the future. Your personnel were helpful, courteous and professional.”
